WE GROW FOR YOU

What is a CSA?

Community Supported Agriculture is a food share program that supports a local farmer. Before the growing season begins community members purchase and commit to a 'share' of the farmers' crop. Each CSA member who purchases a share will then receive a box full of the farmer's current crop in a weekly harvest. Purchasing a share earlier in the year helps farmers more readily prepare for the growing season by providing them with funding which they can use towards seeds, equipment, and other items that will help to ensure a more healthy and abundant crop. CSA programs are a great way to enjoy fresh, local produce throughout the Minnesota growing season. On our farm we grow and maintain at least 50 different crops to be harvested for the 17 week duration of the program.

What to expect:

Please note that these dates are approximate, growing seasons vary year to year

Why Choose Us?

We plant around 50 different crops each year solely for our CSA members. That means each box will have 7-8 different types of vegetables and always try to include at least one fruit.

Our production season is longer due to our high-tunnel technology and unique, sustainable farming practices. That means more food for you!

We are constantly researching new technology and educating ourselves in new techniques not only to help in producing the finest quality product, but also to be a positive, contributing force in the industry. To us, it is important that we practice methods to preserve our precious earth for future generations.

We cannot succeed without your support! Your membership helps keep us running. We have a deep appreciation for our community members so one way we show our appreciation is by hosting a farm tour for our members and their families.

For 40 years our successes have been, and will continued to be shared with our community. As we continue the third generation of our family farm we are always humbled in remembering that...

WE GROW FOR YOU
