

84TH BRIDGE REHABILITATION

PROJECT OVERVIEW

KEY GOALS

- **Pedestrian Bridge:** Rehabilitate and preserve the existing structure to maintain its functionality for the community while preserving its service life.
- **Retaining Walls & Approaches:** Replace critical infrastructure to improve stability, safety, and accessibility for trail users.
- **Aesthetic Enhancements:** Evaluate creative features such as improved lighting to elevate the area's appeal.
- **Trail Enhancements:** Address geometric challenges related to the trail's alignment and clear zone requirements to ensure safety and accessibility.

PRIMARY CONSTRUCTION *SUMMER-FALL 2026*

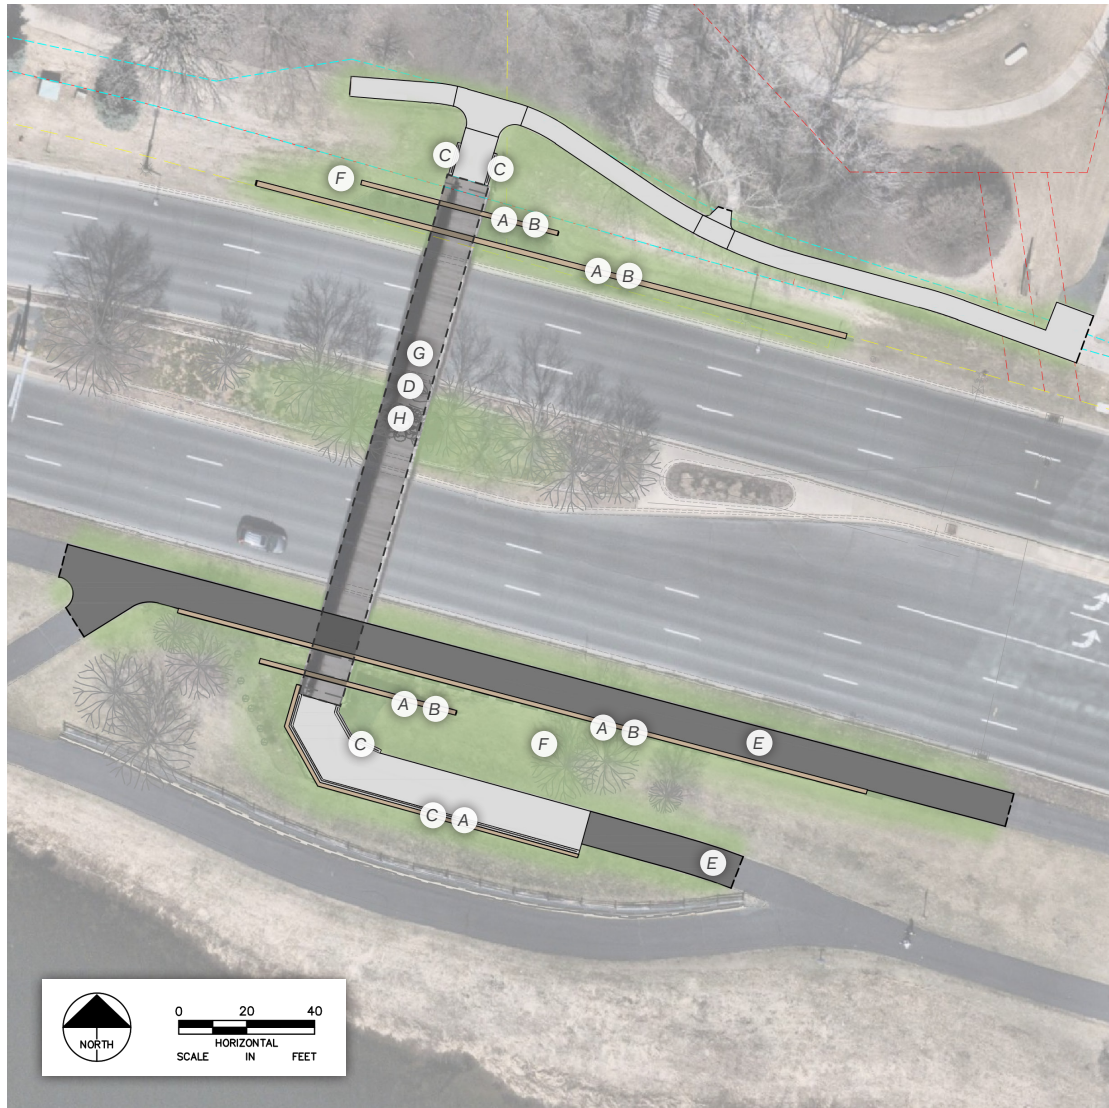

- Pedestrian Bridge
- Retaining Walls and Approach Work

SECONDARY CONSTRUCTION *SPRING 2027*

- Permanent Vegetation and Plantings
- Potential Aesthetic Enhancements

84TH BRIDGE REHABILITATION

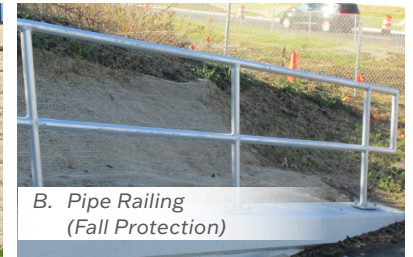

SITE IMPACTS

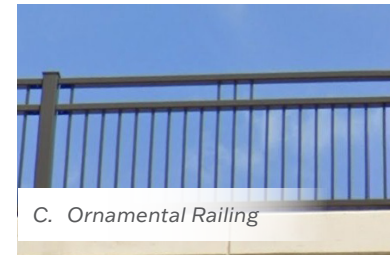

Depicted products are subject to change during final design

A. Retaining Wall

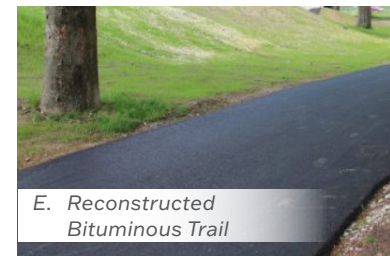

B. Pipe Railing
(Fall Protection)

C. Ornamental Railing

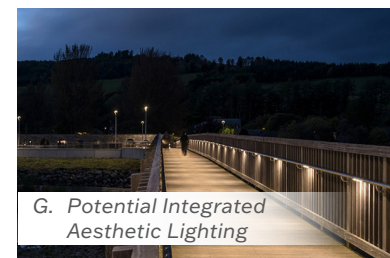

D. Stainless Steel
Cable Railing

E. Reconstructed
Bituminous Trail

F. Landscape Restoration

G. Potential Integrated
Aesthetic Lighting

H. Existing Pedestrian
Bridge
